Office of Technology Services

Engineering/Mainframe Services/DB2Support Unit
Systems Software Specialist III (Technical) \$6388 - \$8396
Permanent/Fulltime

Final File Date: 12/2/16 or Until Filled

Who Are We?

The Department of Technology's Office of Technology Services (OTech) is one of the largest suppliers of information technology services to state, county, federal, and local government entities throughout California. Through the use of a scalable, reliable and secure statewide network, combined with expertise in voice and data technologies, OTech delivers comprehensive, cost-effective computing, networking, electronic messaging and training solutions to benefit the people of California. We are one of the few state entities with a state of the art Tier III data center.

Staff operates out of the Rancho Cordova area, supporting the operations of some of the largest and most sophisticated computer systems in California. Our services help ensure that critical information technology applications Californians depend on every day are available and secure.

We provide excellent health benefits, generous vacation and sick leave accrual, exceptional retirement benefits, 11 paid state holidays, and two paid professional development days per year and value the importance of your work life balance. We are committed to growing all of our talented staff. This position is located in Rancho Cordova with free parking.

What You'll Be Doing...

As the Systems Software Specialist III (SSS) (Technical) you will assume a master level technical specialist role in the DB2 Unit of the Software Section within the Mainframe Services Branch. The areas of responsibility of the unit involve the support of DB2 systems and a variety of IBM and other 3rd party products working with Mainframe DB2 systems. You will share primary responsibility for the installation, upgrades and maintenance of DB2 systems and variety of DB2 software productions across all OTech's mainframe platforms. The SSS III (T) is a master of the software installation process with a complete understanding of DB2 and the z/OS operating system and its subsystems: e.g. JES2/JES3, DFSMS, RACF, and TSO. The SSS III (T) consults and assists both OTech staff and clients with their DB2 system requirements to ensure needs are satisfied and are required to perform, document and participate in disaster recovery activities.
